HOBBIES

- Reading
- Traveling
- Watching Movies

LANGUAGES

- English
- Igbo

for restaurants across India and the United Kingdom, It provides restaurant owners with a fully customized mobile app to run their restaurant on, providing order, delivery and analytics on sales and so on.

- Created new functionalities such as cashback (coin payment), sales analytics. This is used as rewards for users and bonuses of the app.
- Added calling extension for clients and delivery persons which enable easy access to information concerning orders
- Created offline and online servers and syncing of data which improved the server response time by a high margin driving sales and higher customer satisfaction.
- Solid APIs built on NodeJs framework SailJs and StrapiJs power the app.
- **Server Tech Stack**

  NodeJs SailsJs StrapiJs Express MYSQL SailsORM
